Subject: Notice of Annual Routine Preventive Maintenance, Temporary Change in
Primary Disinfectant.

Reference: Bluebonnet Water Supply Corporation Notice, subject same as above.

Dear Sir or Madam,

Moffat Water Supply Corporation will revert from Chloramines to using Free Chlorine as the primary disinfectant effective October 28th through November 18th, 2013. This is part of the annual maintenance program we participate with Bluebonnet Water Supply Corporation who is our surface water provider.

We respectfully request that no samples for disinfection by-product analysis be taken in our distribution system until we return back to using Chloramines as our primary disinfectant. We will notify you when our distribution system is back to normal operating condition.

If you have any questions, please call the office at 254.986.2355.

Respectfully,

Mark Truelove,
Operations Manager
